

COMMISSIONING PROJECT MANAGER – SAN JOSE, CA

We are seeking a **Commissioning Project Manager** to join our professional team in the **San Jose, CA** area.

POSITION DESCRIPTION

The **Commissioning Project Manager** will be responsible for the successful management and execution of the **Building Commissioning, LEED® commissioning, facility assessments, and energy-related services**. At EEI, the **Commissioning Project Manager** is the **primary** representative of the firm and the single most visible and important person to our clients. You'll use your technical, project management, and people skills to manage projects and people from the start to the completion of a project. In addition, you'll partner with our Satellite Manager in networking business events, making sales presentations, and helping create business opportunities for the firm. The Project Manager reports directly to a Satellite Manager and may supervise engineers, field personnel and other technical support staff as needed.

This position involves significant client interaction, project management, problem resolution, and MEP-related engineering services.

To apply, please send a cover letter, salary requirements, and resume to:

Engineering Economics, Inc.
780 Simms Street, Suite 210
Golden, CO 80401
Fax: 303-565-1698

An EEO/AA Employer M/F/V/D
